

Thank you for your interest in obtaining natural gas service from Bay State Gas.

We would be happy to investigate making natural gas service available from our gas main to the proposed site, and ask that you provide the following information:

- Approved utility site plan or drawing that reflects the project location including cross streets **TO SCALE**
- Service address of building(s) and unit number(s)
- Service route and meter(s) location at each building
- Square footage of each building/unit
- Natural gas load requirements (BTU rating of each piece of gas equipment) broken down by meter
- Required delivery pressure for each meter if in excess of 7 inches water column
- Property owner name, address and fax number
- Construction contact name and phone number
- Construction timeline or when service will be required

Required time to engineer and price service installations is approximately three weeks. We will contact you at that time to discuss the terms of our agreement.

Thank you for your interest in doing business with Bay State Gas.

Sincerely,

Bay State Gas
